Ten Habits of Great Problem-Solvers by Scott Mautz

One of the most fundamental skills to build at work—and in life—is the ability to solve problems. Facing problems is an integral part of everyday life, but you need more than just a clunky, mechanical, step-by-step process if you really want to solve them.

In this course, join instructor Scott Mautz as he shows you how to build the daily habits that make problem-solving more natural and instinctive to implement. Learn how the science of building habits can be applied to the discipline of problem-solving.
